

Best Practices for Enrollment Success!

Best Practices for Enrollment Success!

Ask Every Patient, Every Time

Incorporate into Workflow

Use Flagging System

Use Resources

Assign an Owner

Set Staff Goals & Incentives

- Implement policy in your practice to educate every patient in your practice about CurrentCare, every time you see a patient
- Ensure that CurrentCare Education to patients is thoroughly incorporated into your workflows
 - » Include CurrentCare enrollment forms with your usual patient paperwork at sign-in or new patient packets
- Implement a flagging system within your EHR (template, note area) to indicate if the patient is already enrolled or refused CurrentCare so you don't have to keep asking the same people
- Ask CurrentCare for most recent signage and display information; use them to help explain the value of CurrentCare to your patients
- Ensuring success at your practice begins with an owner. Appoint a primary contact for CurrentCare at your practice. They can monitor results and ensure processes are being followed
- In order to succeed, we need a goal. Incent your staff by assigning a goal and then beating them! Once beaten, reward staff with incentives to keep activities motivated
