

# CurrentCare Guidebook

A guide to patient information available in CurrentCare  
June 1, 2018

CurrentCareRI.org

## BENEFITS

- ✓ Improve patient care
- ✓ Save staff time
- ✓ Increase care coordination
- ✓ Helps meet value-based programs

### Inside...

What is CurrentCare? **2**

Clinical Data **6**

Primary Care **10**

Specialists **11**

Rhode Island  
Quality Institute

## What is CurrentCare?

CurrentCare is Rhode Island's statewide Health Information Exchange (HIE), designed and built through the cooperative effort of the RI healthcare community. This secure network collects information from practices, hospitals, labs, imaging centers, pharmacies and other data sources to share crucial patient information and avoid fragmented data. When patients opt in to CurrentCare, their provider(s) can access their available healthcare information to provide the right care at the right time. Through CurrentCare, duplicate testing can be avoided and clinical staff can quickly access critical information in real time to support safe and effective transitions of care.

➔ Individuals enrolled in CurrentCare can securely access their personal health record online 24/7 with CurrentCare for Me.

[CurrentCareRI.org](http://CurrentCareRI.org)

## Systems Sharing Data with CurrentCare

CurrentCare is able to receive clinical information from 11 Electronic Health Record or Health Information Exchange systems:

Allscripts	Greenway
Amazing Charts	Intergy
athenahealth	MEDITECH
Cerner	NextGen
eHealth Exchange	PointClickCare
Epic	

The following EHRs receive clinical summaries from CurrentCare directly into their patient records:

athenahealth\*\*  
 eHealth Exchange  
 Epic\*\*  
 Intergy\*\*  
 MEDITECH  
 NextGen

\*\*Able to add and reconcile medications, allergies and problems

## Clinical Data Available

### Encounter Documents

#### Clinical Documents

**Continuity of Care Documents (CCDs)** provide a record of the most recent encounter from an organization, including the most up-to-date problems, meds, and allergies. May include vitals, procedures, history, progress notes or other practice-specific information. Titles include: **Summary of Episode Note, Continuity of Care Document or Medical Record Summary.**

#### Discharge Documents (Hospitals)

**Discharge CoCs (Continuity of Care Documents)**, required by the State of RI, include a summary of a visit to a hospital or ED. Individual visits can be viewed as separate documents, including prescribed meds, discharged-to location, patient instructions & more! Downloads to your computer, viewable in Word or WordPad.

**Discharge summaries** are available only after sign off by a treating provider. May include a reason for hospitalization, discharge condition, and patient & family instructions. Frequently it will contain **Hospital Course/Progress notes.** Will typically be available after the resident/provider has signed off, and will be updated after an attending provider signs off.

### ADT (Admission, Discharge, Transfer)

Ever wonder where your patients are? When a patient has been admitted or discharged, you can view **Encounter Data** from the hospitals and skilled nursing facilities that share ADT information with CurrentCare.

### Encounter Data

You will find encounter-specific data on the following tabs: **Medications, Conditions, Allergies & Alerts**, and you can see a list of encounters on the **Encounters** tab.

### Test/Results

You will find results on the following tabs: **Lab Results, Diagnostic Imaging, EKG Imaging.** Also found in the patient's Summary Report and within some Documents.

### Part 2 Data

Substance Use Disorder (42 CFR Part 2) — Medical and behavioral health information from substance and alcohol treatment centers ('Part 2 Data') for patients who have consented to share this information.
